PROJECT #2.2314.48

Nurses' Station

Charting Room

Project Scope:

LAN is the Architect and Engineer of Record for the Nurses Station renovation at Heritage Manor East. The project consists of two nurses stations with a central core of charting, medication and utility rooms. LAN worked with the staff at Christian Health Care Center to ensure that the Nurse's Stations and the functional arrangement of the support rooms would ensure an efficient and comfortable working environment. The design incorporated an updated aesthetic and information area to help visitors and patients orient themselves in the symmetrical arrangement of rooms and corridors. A new charting room was added to comply with HIPAA requirements.

LAN designed the renovation strictly adhering to applicable codes and standards. HVAC, electrical, plumbing and sprinkler modifications were included in the project scope. LAN provided construction observation services throughout the construction phase. The project was completed in July 2007.

Services Performed:

- Architectural Design & Documentation
- Civil, Structural, Mechanical, Electrical & Sprinkler Engineering
- Construction Administration & Observation

Program Highlights:

- Nurse's Station
- Information/Reception Station
- Charting Room
